

Answering Quality Questions at Scale.

Quality Chatbot

Botable is an intelligent chatbot that answers your employees' most pressing quality questions faster, resulting in happier and more productive employees.

Available on Slack, Teams, Google Workspace, and more.

✓ Transform Quality Operations

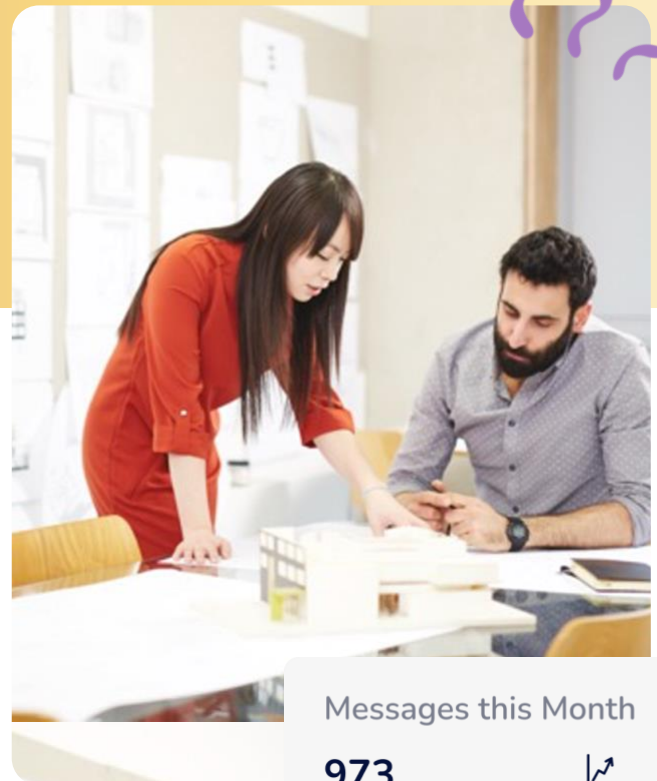

Botable transforms quality operations by eliminating manual document searches. Your employees simply ask questions and Botable automatically answers based on the information contained within your quality documents in Arena.

✓ Increase Efficiency

By instantly and accurately answering quality questions, Botable enables your quality team to prioritize critical issues and strategic initiatives.

✓ Gain Incredible Insights

Through real-time access to all questions and answers in a centralized platform, Botable empowers your quality team to promptly make informed decisions and expedite process improvement initiatives.
